

## PRESS INFORMATION for immediate release

---

### ORIENT STAR “SKELETON”

ORIENT WATCH CO., LTD releases ORIENT STAR “SKELETON” in the summer 2012.

One of the most distinguished brands of ORIENT WATCH, ORIENT STAR, that was first created in 1951. The mechanical watches are simple but feature an exquisite style, worthy of the brand name with its celestial connotations. The lineup offers a diverse selection of products, featuring solid technologies all backed by its history, and designs that reflect the care take with every detail.

Our latest ORIENT STAR “SKELETON” is ORIENT WATCH’ s flagship model, and is developed by fusing the company’ s tradition and technology. It features a high-precision, hand-winding movement and comes with case, band, and dial carefully finished to exquisite detail and style.

The dial takes a dual-layer structure to offer a broader perception of movements that are visible, allowing an exciting view of mechanical movements through the sapphire glass surface.

It can run continuously for more than 50 hours when fully wound and features a second-hand halt mechanism in the crown that stops the second hand when pulled.
